Subject: Asbestos Acceptance Policy

Dear Customer,

This letter is written to reiterate our policy concerning the acceptance of asbestos. Our facility is permitted to accept non-hazardous waste. Signage at our entrance clearly states that we accept only non-hazardous waste.

Non-hazardous waste is defined in California Code of Regulations Title 22. Our facility is further regulated by a Waste Discharge Order issued by the Regional Water Quality Control Board. A copy of the relevant portion of that permit is attached. Under the portion of that order entitled prohibitions is the following wording:

## B. PROHIBITIONS

3. c. Hazard waste, except waste that is hazardous due only to its asbestos content. Asbestos containing greater than one percent friable material is considered hazardous.

In order to enforce this prohibition, Chicago Grade Landfill requires each load to be accompanied by laboratory data supporting the conclusion that the material is non-hazardous (< 1% friable), and a non-hazardous waste manifest. If the load is part of a larger project, then only one laboratory data submittal may be required if the specific material sample location or test number is identified on each waste manifest.

Each laboratory submittal must be reviewed by Chicago Grade's consultant prior to acceptance. Our review may require a 3-10 day approval process. In addition, all loads must be wrapped in uncompromised (no tears) orange plastic bags. If a bag is torn, or

otherwise compromised when unloaded, it will be rejected and must be removed from our premises by the hauler.

If you have questions concerning our acceptance policy, please contact our office manager, Dannette Fieguth at 805-466-2985 x 13.

Sincerely,

CHICAGO GRADE LANDFILL, INC.

RECEIVED

Dear Mr. Hoover:

## ADOPTION OF WASTE DISCHARGE REQUIREMENTS ORDER NUMBER R3-2009-0001 FOR THE CHICAGO GRADE CLASS III LANDFILL; SAN LUIS OBISPO COUNTY

Enclosed is a signed copy of Waste Discharge Requirements Order No. R3-2009-0001, and Monitoring and Reporting Program No. R3-2009-0001 (collectively, "Order") that were adopted by the Central Coast Water Board at its February 5, 2009 meeting.

Water Board staff have also posted a copy of the Order on our Website for other interested parties to view and print should they wish to do so. The Order is available at the following Web address:

[http://www.waterboards.ca.gov/centralcoast/board\\_decisions/adopted\\_orders/index.shtml](http://www.waterboards.ca.gov/centralcoast/board_decisions/adopted_orders/index.shtml)

If you have questions please contact Dean Thomas at 805-549-3690.

Sincerely,

Roger W. Briggs  
Executive Officer

CC:  
(without enclosure)

48. In May 2008, the CIWMB stated that the Discharger has demonstrated availability of financial resources to conduct closure and post closure maintenance activities and an appropriate financial assurance instrument for corrective action for a reasonably foreseeable release at the Landfill. The financial instruments for closure, post closure maintenance, and corrective action are annually adjusted for inflation.
49. Effective March 30, 2009, the Department of Toxic Substances Control (DTSC) repealed conditional authorization letters that allow automobile shredder waste that is subjected to certain treatment requirements to be classified as non-hazardous waste because DTSC's testing and analyses has shown increasing levels of hazardous constituents in the treated shredder waste.
50. On November 13, 2008, the Water Board notified the Discharger and interested agencies and persons of its intent to issue Waste Discharge Requirements for the Landfill, and has provided the opportunity to review a copy of the proposed Order and submit written views and comments.
51. After considering all comments pertaining to this discharge during a public hearing on February 5, 2009, this Order was found consistent with the above findings.

**IT IS HEREBY ORDERED** pursuant to authority in §13263 and §13267 of the California Water Code, the Discharger, its agents, successors, and assigns in maintaining the Chicago Grade Class III Landfill shall comply with the following:

**A. COMPLIANCE WITH OTHER REGULATIONS AND ORDERS**

1. Discharge of waste, operations, and monitoring shall comply with all applicable requirements contained in Title 27 and 40 CFR Parts 257 and 258. If any applicable regulation requirements overlap or conflict in any manner, the most water quality protective requirement shall govern in all cases, unless specifically stated otherwise in this Order, or as directed by the Executive Officer.
2. The Discharger shall control stormwater runoff releases from the Landfill by complying with all requirements contained in the General Stormwater Permit for Industrial Activities.
3. This Landfill is subject to Water Board's Cleanup and Abatement Order No. R3-2002-0130 "Moratorium on the Disposal of Decommissioned Materials to Class III and Unclassified Waste Management Units" adopted on October 11, 2002.

**B. PROHIBITIONS**

1. Discharge of waste to areas outside the Permitted Disposal Area for the Waste Management Unit as illustrated in Figure 2 is prohibited.
2. Discharge of waste within the "Permitted Disposal Area for Waste Management Unit" is prohibited except as provided in **Specification C.3.**

3. Discharge of hazardous waste or hazardous constituents, except for treated wood waste or waste that is hazardous due only to its asbestos content, is prohibited. Wastes that are prohibited include but are not limited to:
  - a. Radioactive wastes.
  - b. Designated waste.
  - \* c. Hazard waste, except waste that is hazardous due only to its asbestos content. Asbestos containing greater than one percent friable material is considered hazardous.
  - d. Chemical and biological warfare agents.
  - e. Waste solvents, dry cleaning fluids, paint sludge, pesticides, phenols, brine, and acid and alkaline solutions.
  - f. Oils or other liquid petroleum products.
  - g. Wastes that have the potential to reduce or impair the integrity of containment structures or which, if commingled with other wastes in the unit, could produce violent reaction, heat or pressure, fire or explosion, toxic by-products, or reaction products.
  - h. Wastes that require a higher level of containment than provided by the Landfill.
  - i. Liquid or semi-solid waste containing less than 50 percent solids by weight. This includes landfill leachate and gas condensate, except as allowed by **Specification C. 6.**
4. Discharge of waste or leachate to ponded water, drainageway(s) or waters of the State, including groundwater, is prohibited.
5. Discharge of liquid waste, meaning any waste materials that are determined to contain free liquids through visual inspection, or as defined by Method 9095 (Paint Filter Liquids Test), is prohibited.
6. Discharge of waste within 50 feet of the property line, 100 feet of surface waters, or 100 feet of domestic water supply wells is prohibited.
7. Discharge of automobile shredder waste (Finding No. 49), with the exception of shredded tires for alternative daily cover, is prohibited.

### C. SPECIFICATIONS

1. Discharge of waste shall not cause a condition of pollution or contamination to occur through a statistically significant release of pollutants, contaminants, and/or waste constituents, as indicated by the most appropriate statistical [or non-statistical] data analysis method and retest method described in MRP No. R3-2009-0001.
2. Discharge, collection, and treatment of waste shall not create nuisance, as defined by California Water Code Section 13050(m).
3. The Discharger shall not discharge waste to areas inside the "Permitted Disposal Area for Waste Management Units," which did not receive waste as of April 9, 1994, unless the discharge is to an area equipped with an Executive Officer-approved containment system consisting of a composite liner and LCRS. The liner must consist of the following three components, pursuant to 40 CFR 258 and Title 27 §20340:
